Can any of our readers tell why it is when the mercury is monkeying around zero, a person who is possessed of an average amount of that useful commodity—brains—will come and tell you "It's cold." Or when it is fine, will tell you "It's a nice day." Will people never, never pause and think how absurd it sounds.

An editor of a country newspaper puts it thusly: "How is it that our readers expect us, out here twelve miles from a railroad, twenty-five miles from a river, millions of miles from heaven, about two miles from the devil, and only two hundred yards from a whisky shop, to get out a newsy, lively and interesting paper?"

Miss Leannata Billman entertained a large number of the young people of the village in a very pleasant manner last (Wednesday) evening, at the home of her parents. The programme consisted of music, charades and other social amusements. Although a resident of the village but a short time, Miss Billman has made many friends by her kind and sociable disposition.

It is not what people eat, but what they digest, that makes them strong. It is not what they gain, but what they save, that makes them rich. It is not what they read but what they remember that makes them learned. It is not what they profess, but what they practice, that makes them righteous.

Rules for contracting "Grippe": Take a good bath twice a year whether you need it or not. When you come out of a hot room stand on the side walk with your coat unbuttoned and breathe through your mouth, or get a good close shave and do the same thing. Never take any quinine and whisky, but drink lots of tea and coffee, and eat lots of pie and cake.

A good remedy for croup is said to be half a teaspoonful of alum scraped fine, and mixed with an equal quantity sugar. Give a teaspoonful to a child under four years of age, a little more to one older. Give also a little water to help it down. Prompt action is necessary whenever one hears the peculiar cough which accompanies this disease, and a simple remedy, given at once, will often avert the threatened danger.

The Detroit Journal year book for 1890 is at hand and contains 128 pages of useful information on nearly every subject, 34 pages being devoted to Michigan, its politics, the results of its recent elections, etc. The book is not for sale by anyone, and the only way to secure it being by subscription to the Journal, and alone is well worth the price of subscription to that reliable and hustling paper. All subscribers receive the year book free.

Rules to be observed when you enter this office: Keep your hands and eyes off "copy," you will get it all when the paper is published; do not whistle and sing, if we feel like being entertained in the way of music, we will let you know; do not bother the compositors, they can't talk and "set" type at the same time successfully; do not endeavor to pick up type, it is very likely to "pi" keep six feet from the "devil," as we do not wish you to be in bad company. Follow these rules and you will have our thanks.

George Smith, formerly of Brockway, was buried on Saturday last at Springhill cemetery. The services were held at Brockway, conducted by Rev. S. N. Hill. The deceased was a noble young man, aged 24 years, who by hard work and exposure had contracted a pulmonary disease, of which he died in St. Mary's hospital at Saginaw on the 9th inst. His parents, one brother and sister have gone before, leaving five brothers and one sister still living. He was buried by the side of his parents. Thus the family ties are broken, and the call of our Lord is respected, to be ready for his coming. Blessed is that servant whom the Lord shall find watching.

Last week Cornelius Cooper, of this place, who has been collecting for Anderson & Co., of Pt. Huron, for some time past went to Brown City to make a collection from Geo. Riley, the livery man of that place. The claim was a lease note of seventy dollars holding title to three buggies. Riley went out to North Branch to get the money due him there, Cooper promising in the meantime to wait until he came back, or until 5 o'clock p. m., Saturday. About 4 o'clock Cooper got tired of waiting and hitched on to a couple of buggies and brought them down to Yale. An after examination revealed the fact that Cooper had taken a buggy that he had no lien upon, and Tuesday an officer came down from Brown City and arrested him for larceny. The matter will probably be amicably adjusted.

We apologize for mistakes made in all former issues and say they were inexcusable, as all an editor has to do is to hunt news, and clean the rollers and set type, and sweep the floor, and pen short items, and fold the papers, and write the wrappers, and make the paste, and mail the papers, and talk to visitors, and distribute type, and carry water, and saw wood, and read proofs, and correct mistakes, and hunt the shears to write editorials, and dodge the bills, and dun the delinquents, and take cuttings from the whole force, and tell our subscribers that we need money. We say that we have no business to make mistakes while attending to these little matters, and getting our living on gonper-tail soup flavored with imagination, and wearing old shoes, and no collar, and a patch on our pants, obliged to turn a smiling countenance to the man who tells us that our paper isn't worth a dollar, and that he could make a better one with his eyes shut.

B. R. Noble, our popular banker, recently purchased a new and improved style of oil heating stove and placed the same in his cosy apartments over the bank. The principal heating part of this stove is a heavy brass radiator which sets over the flame. The radiator is filled with water, which, when hot, warms a room very nicely. One evening shortly after putting in this stove, as Mr. Noble was about retiring for the night he thought he would remove the cap from the top of the heater so it would work better. He commenced carefully unscrewing the same, when all at once—bang! went the stove, the cap flew out of his hand, the room was filled with steam, and Dr. Gowan who ran out of his office at that moment to see what had happened, found a very frightened man standing out in the hall, evidently trying to make out whether he was the victim of a steamboat explosion or a bad case of nightmare.
